

DreamFinder — Image Upload Guide

Place your image files in the folders below. Mattress files are matched by the mattress NAME (lowercased); accessory files by the Image File Name you enter in the workbook. Send any common image format - everything is converted to JPG.

FOLDER STRUCTURE

logos/

[brand]-logo.png One logo per brand you carry (e.g. `serta-logo.png`). These appear in the "Our Brands" footer section. Transparent PNG is ideal; name it to match the Brands tab "Logo File Name" column.

Optional, not used yet:

store-logo.png The app currently shows your store NAME as styled text, so a store-logo image is not displayed yet.

store-icon-192.png Installable-app (PWA) icons are a planned enhancement and are not wired into the app yet. Send them now for future use if you like, but they are optional.

store-icon-512.png

mattresses/

<name>.(jpg|png|webp) One file per mattress, named to match the mattress NAME (lowercased). Example: `athena.jpg`, `royal-cloud.jpg`

accessories/

<file>.(jpg|png|webp) One file per accessory, named to match that accessory's Image File Name. Example: `base-bt3000.jpg`, `copper-ice-regular.jpg`

IMAGE SPECIFICATIONS

Mattresses:	Up to 1000px on the long edge		Any format (JPG/PNG/WebP) - converted to JPG
Accessories:	Up to 1000px on the long edge		Any format (JPG/PNG/WebP) - converted to JPG
Store Logo:	Min 400px wide		PNG with transparent background (kept as-is)
PWA Icons:	Exactly 192x192 / 512x512		PNG, square, no transparency (kept as-is)

ABOUT AUTO-CONVERSION

Mattress and accessory images are automatically resized to 1000px max and re-encoded as optimized JPG (quality 88) during build. So:

- Send us the highest-quality source you have
- DON'T pre-shrink, pre-compress, or pre-convert
- DON'T worry about file size or format (JPG/PNG/WebP all fine as input)

Logos and PWA icons are NOT auto-converted - those need to be PNG exactly as specified above.

NAMING RULES

- Use lowercase letters, numbers, and hyphens only
- No spaces - use hyphens instead (e.g., "royal-cloud.jpg" not "Royal Cloud.jpg")
- Mattress files: name to match the mattress NAME (lowercased), e.g. "Athena" -> athena.jpg
- Accessory files: name to match the Image File Name in your workbook
- Input extensions: .jpg, .jpeg, .png, or .webp (output is always JPG)

TIPS

- Product images on a white or transparent background photograph best
- If you don't have product shots, ask your manufacturer – they often have press images
